DETAILED ACTION

Notice to Applicant

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicants' submission filed on May 10, 2006 has been entered.

Response to Amendment

2. In view of applicants' amendments and arguments filed on May 10, 2006, the rejections of claims 17-28 under 35 U.S.C. 103(a) as stated in the indicated Office Action have been withdrawn. Applicants' arguments have been rendered moot in view of the new or modified ground of rejection given below.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of

Art Unit: 2812

the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 21-22 and 27-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamazaki et al. (US Pub. 2002/0024051; hereinafter "Yamazaki") in view of Takacs et al. (US Pat. 6244212; hereinafter "Takacs").

4. Referring to figures 1A-10C and related text, Yamazaki discloses a method for manufacturing a semiconductor device comprising: depositing [Re claim 21] a film 14, and [Re claim 27] an EL material 16 over a substrate 11, but Yamazaki fails to disclose expressly reciprocating an evaporation source in the X direction while moving the substrate in the Y direction at a constant speed.

Referring to figures 1-3 and related text, Takacs discloses an evaporator 42 reciprocating in one direction while moving a substrate 70 in another direction, which is perpendicular to the direction of travel of the evaporator, at a constant speed (col. 4, lines 39-53).

At the time of the invention it would have been obvious to a person of ordinary skill in the art to use the method of deposition, as taught by Takacs, because it would have been to obtain highly uniform film deposition (col. 2, lines 36-43).

5. Yamazaki discloses [Re claims 22 and 28] wherein the semiconductor device is incorporated into an electronic apparatus selected from the group consisting of a video camera, a digital camera, a goggle display, a navigation system, an audio reproducing apparatus, a laptop computer, a game machine, a mobile computer, a cellular phone, a portable game machine, an electronic book, and an image reproducing apparatus (page 15, paragraphs 276-277; see figs. 24A-25B).

Allowable Subject Matter

6. Claims 31 and 34 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: claims 31 and 34 recite the evaporation source includes at least two crucibles arranged in the X direction. This feature in combination with the other elements of the claims is neither disclosed nor suggested by the prior art of record.

7. Claims 17-20, 23-26, 29-30 and 32-33 allowed.

The following is an examiner's statement of reasons for allowance: claims 17 and 23 recite moving a first evaporation source and a second evaporation source in an X direction, wherein the first evaporation source and the second evaporation source are provided in a same chamber in which the film is deposited. Claims 19 and 25 recite making a movement speed of a first evaporation source in an X direction and a movement speed of a second evaporation source in the X direction different, wherein

Art Unit: 2812

the first evaporation source and the second evaporation source are provided in a same chamber in which the film is deposited. These features in combination with the other elements of the claims are neither disclosed nor suggested by the prior art of record.

Claims 18, 20, 24, 26, 29-30 and 32-33 variously depend from claims 17, 23, 19 or 25, so they are allowed for the same reason.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
